Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 & 29 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 recites the limitation "the flange" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Objections

Claim 19 is objected to because of the following informalities:

Claim 19 depends from self.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 4, 7, 21, and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by **Adams (4,545,329)**. **Adams** discloses an apparatus having a body having a first face (front of 63), a second face (back of 69), an inboard surface (79) bounding a central opening, an outboard perimeter (69), an array of bolt holes (73) between the first and second face, a channel (67) in the first face inboard of the bolt holes, ports (75) formed in the perimeter and not in the inboard surface and other ports (opposite of element 53) in communication with channel (67) wherein flow enters one port and exits the other (SEE Figure 2).

Claims 1 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by **Boyd et al (6,513,982)**. **Boyd et al** discloses an apparatus (SEE Figures 7 & 8) having a first and second face (both sides of outboard perimeter 36), an inboard surface (32) bounding a central aperture, an array of bolt holes (38) between the first and second faces, a channel (34) in the first face inboard of bolt holes having multiple ports (56) in communication with the channel and not in the inboard surface (32).

Allowable Subject Matter

Claims 3, 5, 6, 9, and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 12-18, 20, 22, 23, and 25-28 are allowed.
